

Building Committee Update 6/26/20

We continue to make great progress with construction. As you may recall from my newsletter article last month, I wrote that once the weather got better and steel arrived, we would be going "vertical" very quickly - well, we are! Three of the four walls are up, and exponential progress is happening each day. It is amazing to see the change from one day to the next. And, take a look at the pictures of the "South 40" area behind the parking lot. The excavator has cleared trees (note: we saved every tree we could), installed the new drainage rock check dam, and worked on preparing the area for grass seeding. The future use of this large open area is only limited by our imagination. There could be play areas, educational sections, music theater, or whatever we believe is the best use of the area.

Wonders of life continue at Faith. Thank you for your support.

-Jim Curtis and the Building Committee
